PROFESSIONAL SUMMARY

Web developer with 5+ years of experience building and maintaining business web applications and ERP systems using Python, JavaScript, SQL, Frappe, and ERPNext. Hands-on experience across business-critical workflows including admission, enrollment, tellering, billing, payment allocation, grading, employee onboarding and offboarding, and user access management. Career progression from junior to senior development, now owning the school management system and ERP Livro product. Product ownership experience adds strength in translating school business processes into delivered system features and coordinating delivery with development teams.

CORE TECHNICAL SKILLS

ERP & Frameworks: Frappe Framework, ERPNext, ERP Livro, Role Permissions, User Access Management

Programming: Python, JavaScript, TypeScript, React, Tailwind CSS

Databases: MariaDB

DevOps & Infrastructure: Linux, Docker, Git, CI/CD

APIs & Integrations: REST APIs, Online Payments, SMS Billing Gateway Integration

Business Systems: Admission, Pre-Enrollment, Enrollment, Matriculation, Grading, Grade Slips, Teller, Billing, Fee Allocation, Payment Allocation, Discounts, Statements of Account, Employee Onboarding and Offboarding

Product & Delivery: Product Ownership, Requirements Analysis, Business Process Understanding, Stakeholder Coordination, Feature Delivery

PROFESSIONAL EXPERIENCE

Product Owner

Livro Systems, Inc. | January 2026 – Present

- Own the school management system and ERP Livro, driving continued feature delivery with the development team.
- Develop and maintain ERP Livro features for employee onboarding, employee offboarding, and user access requests.
- Maintain online enrollment forms and payment allocation logic, enabling schools to enroll students and apply payments directly in the system.
- Delivered updates to enrollment status, tellering, billing, and SMS notifications sent from the school management system.
- Updated the SMS billing gateway from Smart to Globe so schools can continue sending billing notifications.
- Apply development background to translate school enrollment, billing, and payment processes into deliverable system updates.

Senior Web Developer

Livro Systems, Inc. | April 2025 – December 2025

Senior Web Developer

Wela School Systems | February 2024 – March 2025

- Developed and maintained tellering and billing features covering payment status, fee allocation, matriculation, discounts, and statements of account.
- Built and maintained pre-enrollment and enrollment features for basic education and college, including enrollment status tracking.
- Maintained grading and SMS billing features supporting school operations.
- Configured system access and role permissions for finance and registrar users.

Mid-Senior Web Developer

Wela School Systems | September 2023 – February 2024

- Maintained school billing features on live production sites, including ledger adjustments, discounts, and statements of account.
- Updated matriculation logic so excess discounts are credited against previous balances.

Junior Web Developer

Wela School Systems | March 2020 – September 2023

- Developed and maintained online enrollment forms for school admissions.
- Developed and maintained grade slips and grading rules, enabling schools to issue student results from the system.
- Developed and maintained college billing features for matriculation, fees, and the enrollment ledger.

PROJECT / SYSTEM EXPERIENCE

School Management System: Admission and Enrollment

Online admission and enrollment forms, pre-enrollment, and enrollment status for basic education and college.

School Management System: Billing and Payments

Tellerling, fee allocation, payment allocation, payment status, matriculation, discounts, ledger adjustments, statements of account, online payments, and SMS billing notifications.

School Management System: Grading

Grading rules and grade slip generation for issuing student results.

ERP Livro: Employee Lifecycle and Access Management

Employee onboarding, employee offboarding, user access requests, and role permissions.

Technologies: Frappe, ERPNext, Python, JavaScript, REST APIs, MariaDB, Git, Linux, Docker, CI/CD
