PROFESSIONAL SUMMARY

Adaptable IT professional with 6+ years of web development experience building, maintaining, and improving business applications. Experienced in Python, JavaScript, SQL, REST APIs, and MariaDB, with a background in Frappe/ERPNext and business-critical school management systems running in production. Brings a technical foundation alongside experience in understanding business workflows, troubleshooting live issues, and, as Product Owner since January 2026, turning school processes into deliverable tickets with the development team. Curious, analytical, and committed to continuous learning. Open to Web Developer, Product Owner, and Quality Assurance roles.

SKILLS

Development: Python, JavaScript, SQL, HTML5, CSS

Data & APIs: MariaDB, REST APIs, Online Payments, SMS Billing Gateway Integration

Frameworks & Tools: Frappe Framework, ERPNext, Git, GitHub, Linux, Docker, CI/CD

Product & Process: Requirements Analysis, Workflow Analysis, Ticket Writing, Stakeholder Coordination, Feature Delivery

Quality Assurance: Debugging, Production Issue Resolution, Validation Rules, Unit Testing

Currently Learning: TypeScript, React, Tailwind CSS, Vitest, Playwright

Business Domains: Enrollment, Billing, Payments, Grading, Employee Workflows, Role Permissions

PROFESSIONAL EXPERIENCE

Product Owner

Livro Systems, Inc. | January 2026 – Present

- Own the school management system and ERP Livro, turning school enrollment, billing, and payment processes into clear, deliverable tickets for the development team.
- Develop and maintain features, including ERP Livro employee onboarding, offboarding, and user access requests.
- Maintain online enrollment forms and payment allocation; delivered updates to enrollment status, tellering, billing, and SMS notifications.
- Updated the SMS billing gateway from Smart to Globe so schools can keep sending billing notifications.

Senior Web Developer

Livro Systems, Inc. | April 2025 – December 2025

- Delivered feature and fix tickets on the school management system and ERP Livro.

Senior Web Developer

Wela School Systems | February 2024 – March 2025

- Delivered tellering and billing features covering payment status, fee allocation, matriculation, discounts, and statements of account.
- Delivered pre-enrollment and enrollment for basic education and college, including enrollment status.
- Maintained grading and SMS billing.
- Configured access for finance and registrar users.

Mid-Senior Web Developer

Wela School Systems | September 2023 – February 2024

- Resolved billing issues on live production sites, including ledger adjustments, discounts, and statements of account.
- Updated matriculation so excess discounts are credited to previous balances.

Junior Web Developer

Wela School Systems | March 2020 – September 2023

- Built online enrollment forms for admissions, from 2020.
- Built grade slips and grading rules.
- Built college billing covering matriculation, fees, and the enrollment ledger.

SELECTED PROJECTS

School Management System: Enrollment and Admissions

Web Development · Product & Process

Online enrollment forms for admissions, pre-enrollment, and enrollment status for basic education and college, with a multi-step approval workflow (dean, registrar, finance).

School Management System: Billing and Payment Processing

Web Development · Quality Assurance

Tellering, fee and payment allocation, payment status, matriculation, discounts, statements of account, online payments, and SMS billing, including fixes on live production sites.

School Management System: Grading

Web Development

Grading rules and grade slips.

ERP Livro: Employee Workflows and Access Management

Product & Process · Web Development

Employee onboarding, offboarding, user access requests, and role permissions.

Frappe Contract Tracker (personal project)

Web Development · Product & Process · Quality Assurance

Frappe 15 app for quotes, contracts, and payments: Draft, Approved, and Done workflow, owner and assistant roles, payment checks against the balance, an Unpaid Contracts report, and 11 unit tests for the business logic.

Technologies: Python, JavaScript, SQL, MariaDB, REST APIs, Git, Linux, Docker, CI/CD, Frappe, ERPNext
